## About This Game

You are a master of time. You can set it to past, present and future. Use this power to help a mechanical bird complete its extremely important mission of collecting the knowledge about a mysterious green world. This is not an easy task, as the bird moves on its own, and you cannot stop it. Control time to activate and deactivate various mechanisms, to make sure the bird reaches the cage without dying.

The game features fifty carefully designed levels. You will need to make your way through a hostile world - the blades of windmills will slice the bird, pistons shall squash it and spiked gates are going to crush it. Control time to deactivate traps and activate the steam generators that will change your movement direction. Find one of many ways to the end of each level. Plan your route and show your reflex skills to get through the most difficult paths and gather all the gears.

## Game Features:

- 50 levels full of dangers
- controlling time and thus influencing the environment
- many different paths to the destination
- a unique green graphical style
- soul jazz soundtrack

- 
- power-ups (immortality, slow flight, etc.).
  - 150 gears to collect
  - one-more-try-and-I-quit syndrome

Publisher:

iFun4all S.A.

Release Date: 4 Apr, 2016

b4d347fde0

English,French,Italian,German,Simplified Chinese,Japanese,Korean,Polish,Portuguese

---

I would recommend this for some people. It could be polished more but at this price there are a lot of levels for someone who is into this type of puzzle game.

[https://www.youtube.com/watch?v=Z\\_wp0QP7u4k](https://www.youtube.com/watch?v=Z_wp0QP7u4k). Wow... just wow. For 0.89€ on sale, i recommend this for everyone just for the GREAT soundtrack, and if you just use it as a radio xD. I think the gameplay is not as good as in the red game but it's still fun, at least for a while :-)
